IT'S THRILLING TO GROW ORCHIDS

There is Something Very Intriguing About Growing Orchids. Orchids are the thoroughbreds of the flower kingdom. Everyone who loves to grow plants and flowers indoors is attracted by them.

Learn to Love Orchids—Grow them, handle them, and work with them. Orchids are not difficult to grow. They respond readily to intelligent care and live indefinitely.

So Many People Have Expressed A Desire To Grow Orchids in Their Homes that we have designed the Little Orchid House to make it possible. Now you may have the thrill of growing Orchids in your home—right in your living room, dining room, library or even your bedroom or wherever you have a sunny window.

Thousands of Orchid Lovers who have not desired to invest several thousand dollars in a greenhouse and a large orchid collection can now at a most reasonable cost enjoy Orchids.

THE LITTLE ORCHID HOUSE

The Little Orchid House is so simple in design that it fits beautifully in any room or on any porch. The striking contrast of the aluminum finish of the well proportioned Little Orchid House and the black lacquer finish of its graceful table furnishes a worthy setting for the treasure it contains. It fits nicely in front of your window. It can be rolled easily to some other location either to follow the sun or to suit the arrangement of your furniture. It is always the center of interest, for Orchids, like rare pictures, are treasured by everyone.

The Little Orchid House is 38" long, 24" wide and 28" high without the table. **Electric Heat,** thermostatically controlled, (using no more electricity than a 100 watt electric light burning a few minutes at a time), assures maintenance of proper temperature, even though your room cools as low as 45°. A tray of water furnishes the necessary moisture and catches the drip when the plants are being watered. A hinged top permits correct ventilation.

The Low Rolling Table illustrated is designed to conceal the tray of water, is 20" high, finished in black lacquer and made especially to go with the aluminum finish of the Little Orchid House. The table is not essential for successful use of the Little Orchid House but adds greatly to its convenience and beauty.

INEXPENSIVE

The Little Orchid House in aluminum finish, with a tray for water and an electric heater thermostatically controlled, complete.....**\$50.00***

ORCHID PLANTS for the LITTLE ORCHID HOUSE

are selected from our splendid collection of more than 160,000 mature, flowering orchid plants and countless seedlings. The largest collection of flowering Orchid Plants in the world.

Each plant is of suitable size for the Little Orchid House and should bear from one to three or more flowers each year.

Since each variety of orchid has a very definite flowering season, unusual care is taken to select varieties that will furnish a distribution of flowers through the year.

If you prefer, however, all of your flowers during a certain season or seasons, tell us when you want them and we will select a suitable collection to meet your requirements.

FOUR ORCHID PLANT COLLECTIONS

GROUP 1—Four Plants\$25.00
